

Levi Moreira

Mobile Developer

Experience

2017-05 - present

Android and Web Developer

LDS Labs

Worked in the development of an Android App to be used by Coworkings in Fortaleza as well as the development of the Backend (using Django) used by the App. The frontend and the backend had to be decoupled therefore Django REST framework was used to the develop an API.

2017-07 - present

iOS Developer

Apple Developer Academy

Took part in an iOS introduction course where the basics of iOS development were taught. The course ended with a 3 weeks development challenge where the students, divided in teams, had to build an app from scratch and the best six students were chosen to stay for another 3 months.

2016-05 - 2017-05

Android Developer

AboutTI

- Worked in the development of two already built apps: Pathus and Gênesis These apps were used by practices and doctors to have a channel of communication with patients.
- Built one app from scratch: Residences. An app for house blocks and apartment buildings.
- At AboutTi the apps were developed using and Agile methodology with weekly meetings. Our channel of communication was Slack and the projects were managed through Jira.

2015-10 - 2016-05

Development and Research Intern

Siscome Lab

Worked mainly with Hardware, specially with PIC microcontrollers and PCB design and testing. Most of the work was done using C or C++. Worked as well with Android Development, mainly for hardware interaction purposes.
